STAT

SUBJECT: Briefing of Senate Staff Members

1. On 23 August 1983, I met with Mr. Chip Andreae and Mr. Larry Kettlewell, staff members of the Senate Select Committee on Intelligence, to brief them on the chemical warfare sampling program in Southeast Asia. I provided them with a brief history of the collection and analysis program, methods and materials used for sampling, and the analysis of samples. We also briefly discussed the current CW activities in Southeast Asia.

2. Mr. Andreae and Kettlewell are scheduled to go to Thailand on the 26 August for about one week to gather first hand information on chemical warfare sampling. They will meet with Dr. Townsend, IRC, who has provided the intelligence community with many of the human tissue samples from attack victims. They did not mention any meeting with other individuals.

3. Mr. Andreae requested a list of the numbers of analysts working in the area of chemical and biological warfare annually since 1972. The list will be prepared for Mr. Andreae when he returns from his Southeast Asia trip.
